Market sentiment was positive in February, helped by a continued improvement in economic leading indicators, particularly in the US. The fund rose +4.1%, with the strongest contributors to return Diageo (interim results), Sage, Imperial Tobacco (trading statement) and Microsoft. The most negative contributors were Diploma, Astrazeneca (final results) and Vivendi (final results). We have sold the fund's holding in Vivendi, concluding that the attractions of its media assets are not sufficient to offset poor management and the negative economics in its telecoms business. Elsewhere we began to rebuild our healthcare exposure where forward returns are looking attractive again after recent underperformance. We have accelerated this shift since the month-end.

The fund went ex an estimated final dividend of 1.62p\* at the end of the month. This makes the full year dividend 4.62p\*, a rise of +7.0%. This increase is in line with our aim of providing a distribution that rises at a real rate over the long-term.

## RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Simplified Prospectus which is available on request. The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish.
