Markets were relatively quiet in October, finishing broadly unchanged ahead of US elections. The economic picture remains mixed - the US continues to show some encouraging (if patchy) signs of recovery, whereas Europe remains stuck in recession and China continues to slow. The fund rose +0.7% compared to +0.5% for the IMA UK Equity Income Sector. Strongest contributors to return were Halfords, Reckitt Benckiser and Unilever, all of which reported positive trading during the month. The only negative contributors of note were Glaxosmithkline and Smith & Nephew, which fell somewhat ahead of their third quarter results. There is little to report in terms of portfolio changes other than the addition of a small position in Compass Group (where recent underperformance has left our estimate of forward cash return looking more attractive).

The latest earnings season has been a mixed bag for the market as a whole, with the number of profit warnings and disappointments increasing. In this context it is reassuring that most Evenlode holdings have updated the market over the last few weeks, and in aggregate are making steady progress. We continue to invest patiently with a strong bias towards large, globally diverse, repeat-purchase franchises. However, I am also alert to the possibility of more opportunities emerging if the recent uptick in stock-by-stock volatility continues.

RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Simplified Prospectus which is available on request. The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish.
