Worries over the possibility of an end to US quantitative easing weighed on investor sentiment in June. Fresh strains in the Eurozone and a continuing slowdown in the Chinese economy added to the more pessimistic mood. The fund fell by -2.5% compared to -2.6% for the IMA UK Equity Income Sector. The most positive contributors to return were WS Atkins, Reed Elsevier and Johnson and Johnson. The most negative were Astrazeneca, Unilever and Glaxosmithkline.

We continue to focus on achieving a healthy balance between high quality, low fundamental risk and attractive valuations within the fund. This month we exited MITIE - although our estimate of forward cash return still looks quite high, we have become increasingly concerned by management's attitude towards both capital allocation and what constitutes a prudent debt level for this type of business. On the buy-side, we added a new holding in software company SAP. SAP has a very strong competitive position, high levels of recurring revenue and a capital light business model. The company is well placed to benefit from the exponential growth of data in the world and the related demand for processing and analysing all this information (a characteristic shared by several other Evenlode holdings). Recent underperformance has left SAP trading on an attractive forward cash return. Elsewhere, many holdings returned to better valuations in the sell-off, and in several cases we have used this weakness to increase exposure.

Hugh Yarrow, Investment Manager

## PERFORMANCE SINCE LAUNCH

■ A - Wise Investments - Evenlode Income B Inc TR in GB [65.60%]  
 ■ B - IMA UK Equity Income TR in GB [44.55%]

## RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Prospectus, the TB Wise Supplementary Information Document (SID) and the TB Wise Key Investor Information Documents (KIIDs) which are available on request and at [www.wiseinvestment.co.uk](http://www.wiseinvestment.co.uk). The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Every effort is taken to ensure the accuracy of the data used in this document but no warranties are given.
