## MANAGER COMMENTARY

Global markets fell sharply in the first two weeks of December, before recovering somewhat in the latter half of the month. Evenlode fell -0.8% compared to a fall of -0.4% for the IA UK Equity Income sector and -1.6% for the UK market. The most positive contributors to return over the month were Sage and IG Group. Sage released reassuring final results and a +7% increase in the dividend, and IG Group released a positive trading update. The most negative contributors were Diageo and Glaxosmithkline. Diageo management noted weaker than hoped for trading over the US Thanksgiving period, while Glaxo announced it will not proceed with the disposal of its legacy drug business at this point in time.

The last quarter saw a higher level of stock-by-stock volatility within our investable universe, which has led us to make a few changes to the portfolio. This month we added new holdings in PZ Cussons and Paypoint following share price weakness. Both are resilient, asset light companies and now trade on dividend yields of 3% and 4.4% respectively. We also continued to reduce our position in Reed Elsevier on valuation grounds.

Looking ahead to 2015, the outlook is very mixed from both an economic perspective and a valuation perspective. In this uncertain context, we will continue to work hard on retaining an attractive combination of quality, resilience and value within the Evenlode portfolio.

## IMPORTANT INFORMATION

Evenlode Income is a sub-fund of the TB Wise OEIC. Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Prospectus, the TB Wise Supplementary Information Document (SID) and the TB Wise Key Investor Information Documents (KIIDs) which are available on request and at [www.wiseinvestment.co.uk](http://www.wiseinvestment.co.uk). The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Every effort is taken to ensure the accuracy of the data used in this document but no warranties are given.
