Markets resumed their upward trajectory in July, helped by the Federal Reserve's efforts to stress that easy monetary policy is here to stay for the foreseeable future. Elsewhere, China's economic slowdown is keeping a lid on global inflation. This is giving some much-needed relief to consumers in the developed world (most notably in the US where leading indicators remain strong). The first half results season is now largely over and companies have generally reported solid (if not spectacular) results, with a broad trend of stabilisation in Europe and improvement in the US, offset by a slowdown in certain emerging markets. Improving profit margins have also been a notable theme, with companies such as Reed Elsevier and Diageo successfully converting low or mid single-digit revenue growth into high single-digit or double-digit profit growth. This is feeding through to healthy dividend growth for the portfolio.

The fund rose +4.6% compared to a rise of +6.1% for the UK Equity Income Sector. The largest contributors to return were Reed Elsevier, Pearson and WS Atkins, all rising after results and trading updates. The only significant negative contributor was Microsoft, which fell on disappointing quarterly results. We added to Microsoft and also continued to build the fund's position in SAP. Elsewhere we have increased exposure (for the first time in several months) to Unilever and Reckitt after recent underperformance.

## RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Prospectus, the TB Wise Supplementary Information Document (SID) and the TB Wise Key Investor Information Documents (KIIDs) which are available on request and at [www.wiseinvestment.co.uk](http://www.wiseinvestment.co.uk). The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish.
