Markets performed strongly in January as leading economic indicators remained broadly positive for the global economy. The fund rose +6.4% over the month compared to a rise of +4.4% for the IMA UK Equity Income Sector. A large portion of the portfolio has updated the market over the last few weeks and fundamental progress continues to be healthy. The most significant positive contributors to performance were Procter & Gamble (full year results), Unilever (full year results) and Glaxosmithkline (no news). There were no material negative contributors.

We have been quite active on the trading front, exiting the fund's holding in Diploma and substantially reducing positions in Euromoney and Halma. These changes were made purely for valuation reasons. Elsewhere we have added to several holdings including Microsoft, Johnson & Johnson, Sage and Pearson. All these stocks are currently trading on forward cash returns that look very attractive given the quality of their business models.

Hugh Yarrow, Investment Manager

## PERFORMANCE SINCE LAUNCH

19/10/2009 - 01/02/2013 Data from FE 2013

Past performance is not a reliable indicator of future performance

## CUMULATIVE PERFORMANCE<sup>+</sup>

## RISK WARNINGS

Full details of the TB Wise Funds, including risk warnings, are published in the TB Wise Funds Simplified Prospectus which is available on request. The TB Wise Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Capital appreciation in the early years will be adversely affected by the impact of initial charges and you should therefore regard your investment as medium-to-long term. As a concentrated portfolio of 20 to 30 investments Evenlode Income carries more risk than a fund spread over a large number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Every effort is taken to ensure the accuracy of the data used in this document but no warranties are given.
