MANAGER COMMENTARY

The global equity market continued its strong run to finish 2023, and the fund increased in value as well. Driven by the US market, the calendar year marked a complete reversal for stocks from the weakness seen in 2022. In terms of performance drivers for the fund during the year, by sector these were directionally similar to the market but with less extreme movements. To give one topical example, the Information Technology sector delivered a 28% return for the portfolio in 2023 in sterling (Source: Factset), whilst the sector in the broader market (as measured by the MSCI World index) was up by a significant 49%. Relative performance of the fund against the index in the year moved in phases, with strong performance during the first four months when there were concerns around financial stability as banks in the US and Switzerland failed. This was followed by the fund tracking sideways whilst the market rose as the system was stabilised, excitement around the promises of artificial intelligence took hold, and toward the end of the year indications that interest rates would not continue to rise appeared to propel both the market and the fund upward.

Whilst the fund has increased in value, we have been able to maintain the valuation appeal and overall quality of the portfolio with selective activity. Toward the end of the year we added two new positions in US tool supplier Snap-On and Swiss logistics broker Kuehne + Nagel, and disposed of the portfolio's holdings in food and beverage giant PepsiCo and German industrial and consumer conglomerate Henkel. We discussed these in our December 2023 investment view^[i] - please see the link below if you would like more detail on what these companies do for their customers and the reasons for the portfolio moves. Overall, the shape of the portfolio remains similar in terms of its relatively low economic sensitivity and cash generating ability.

Integration into the investment process

SAWAN WADHWA
Head of Stewardship

We consider engagement with companies as an opportunity. Discussing challenges with companies enables us to understand their business context and obtain more information about their mitigation of and resilience to the risks that we perceive. Ultimately though, we are seeking to create long-term value for our clients through improving the sustainability characteristics of a company. However, we understand that all this takes time and a measured approach. This requires us to set appropriate engagement objectives which allow us to stay focused and accurately monitor the results.

WHAT ARE THE RISKS?

As a focused equity portfolio of between 30 and 50 investments, the fund can involve higher risk and higher volatility. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. You should therefore regard your investment as long term. Details on the risk factors are included in the fund's prospectus, available on our website.

INVESTOR PROFILE

The Fund may appeal to investors who:

- ✔ Would like the prospect of sustainable real income growth combined with some capital growth over the long term
- ✔ Accept the risk associated with the volatile nature of equity investments
- ✔ Plan to hold their investment for at least 5 years

IMPORTANT INFORMATION

This Factsheet has been produced by Evenlode Investment Management Limited. WS Evenlode Global Income is a sub-fund of the WS Evenlode Investment Funds ICVC. Full details of the WS Evenlode Investment Funds, including risk warnings, are published in the WS Evenlode Investment Funds Prospectus and the WS Evenlode Investment Funds Key Investor Information Documents (KIIDs) which are available on request and at www.evenlodeinvestment.com. The WS Evenlode Investment Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested, you should therefore regard your investment as long term. As a focused portfolio of between 30 and 50 investments, WS Evenlode Global Income carries more risk than a fund spread over a larger number of stocks. The fund has the ability to invest in derivatives for the purposes of EPM, which may restrict gains in a rising market. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. Every effort is taken to ensure the accuracy of the data used in this document but no warranties are given. This factsheet is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. The sale of shares of the fund may be restricted in certain jurisdictions. In particular shares may not be offered or sold, directly or indirectly in the United States or to U.S. Persons, as is more fully described in the Fund's Prospectus. Evenlode Investment Management Limited is authorised and regulated by the Financial Conduct Authority, No. 767844. Waystone Fund Services (UK) Limited is authorised and regulated by the Financial Conduct Authority, No. 190293.
