What is this product?

Type

ICAV

Term

This product has no specific maturity date.

Objectives

The investment objective of the Fund is to provide long-term total returns with an emphasis on income.

Intended Retail Investor

The Evenlode Global Dividend Fund is appropriate for Retail Investors, Basic, Informed and Advanced. The Fund is appropriate for Investors who are seeking Capital and Dividend Growth. The investor should be aware that 100% of their capital is at risk and is not appropriate for investors who seek a Capital Guarantee or can bear no capital loss including minor losses. The fund is not designed to preserve or limit capital loss.

Be aware of currency risk. The currency of this product may be different from that of your country. As you may receive payments in the currency of this product and not that of your country, the final return you will get will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator: performances of this product might be negatively impacted by market risk, equity investment risk, risks associated with investments in derivatives market, liquidity risk and share class hedging risk.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

Due to effects of unusual market conditions, other risks could be triggered, such as: Equity Investment risk, derivative risk, share class hedging risk, currency risk and liquidity risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between August 2021 and August 2022.

The moderate scenario occurred for an investment in the benchmark between November 2015 and November 2020.

The favourable scenario occurred for an investment in the benchmark between December 2016 and December 2021.

Recommended holding period: 5 years.

Example Investment: GBP 10,000.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | 114 GBP | 970 GBP |
| Annual cost impact (*) | 1.1% | 1.3% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.0% before costs and 10.8% after costs.

These figures include the maximum distribution fee that the person selling you the product may charge (0 % of amount invested / 0 GBP). This person will inform you of the actual distribution fee.
