

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

EVENLODE

Evenlode Global Opportunities Fund (“the Fund”)

Class X Accumulation EUR Shares

This is a sub fund of Evenlode ICAV, an Irish collective asset management vehicle.

ISIN: IE00BLR75C76

Equity Trustees Fund Services (Ireland) Limited is the manager of the ICAV.

Objectives and investment policy

The Fund aims to provide long-term total returns with an emphasis on capital growth.

The Fund will invest predominantly in the shares of global listed companies, with the balance in cash or similar liquid assets.

The Investment Manager aims to invest in a focused portfolio of generally between 30 and 55 companies that offer a combination of high and growing cash-flows and low business risk. The Investment Manager will look to identify financially strong businesses through a combination of quantitative screening on the UK, US and European markets (which together constitute the Fund’s primary investment universe) and fundamental analysis. The fund can invest up to 10% in Collective Investment Schemes that are established as UCITS and eligible under the Regulations.

The Fund may also invest in financial derivative investments which may be used only for hedging purposes. Derivatives are linked to the rise and fall of other assets. They can generate returns when share prices and/or indices fall.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus and the Fund Supplement.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

• This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this Fund:

• **Equity Securities:** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.

• **Concentration:** In certain conditions the Sub-Fund may invest in a relatively small number of securities, which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Sub-Fund than if a larger number of investments were made.

• **Liquidity:** There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.

• **Currency:** To the extent that a Sub-Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.

• **Emerging Markets:** Where a Sub-fund invests substantially in securities listed or traded in emerging markets, the performance of the Sub-fund may be more volatile than a fund that invests in securities traded in developed countries.

• For further risk information please see the Prospectus and the Fund Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

- The ongoing charge for the share class is currently fixed at the rate stated. This figure excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.
